

Understanding Vision

*And its relationship to
learning*

12:15 – 1:00 PM

Sorrento Valley and Lemon Grove

At The San Diego Center For Vision Care

Optometry-P.C.

RSVP 619-464-7713 vtherapy@pacbell.net

Sandiegocenterforvisioncare.com

The visual skills necessary for learning go far beyond the ability to see clearly: “20/20.” This brief seminar provides an introduction into the visual skills that *are* important for learning: Tracking, Eye Teaming, Focusing, Visual Perception, Visual Processing and more.

Too many children are currently misunderstood as not trying hard enough, not being “smart enough” or even having Dyslexia or ADHD. There are many children who have these conditions, but unless their vision is assessed beyond just the eye chart at school or the pediatrician’s office, these children may never know what the joy of learning is like.

Sorrento Valley Dates

January 25	June 14
March 1	August 16
April 5	September 27
May 17	November 8

Lemon Grove Dates

January 24	June 13
February 28	August 15
April 4	September 26
May 16	November 7
